CAREER SUMMARY

I am a dedicated and detail-oriented Bachelor of Science in Information Technology (BSIT) graduate from Eulogio "Amang" Rodriguez Institute of Science and Technology (EARIST), I have a strong foundation in computer systems, software development, database management, and IT support. I began my journey at Comptrolla Technologies as an Intern (On-the-Job Trainee), where I gained hands-on experience working on real-world projects. Due to my performance and dedication, I was absorbed into the company as a full-time Junior Software Developer. Although my official title is Junior Software Developer, my primary focus is on Frontend Development, where I collaborate with the team to design and implement user interfaces that are both functional and visually appealing. I am passionate about continuous learning and eager to contribute my technical skills and growth mindset to a dynamic and innovative organization.
